SAMSUNG

UN55HU7000 Smart 55-Inch UHD TV

Thanks to the Samsung UHD Picture Engine, you can enjoy various kinds of content with near UHD-level picture quality, even if it's not from a UHD source. Samsung's innovative processing enhances broadcast TV shows and movies as well as video on demand and more. That means not only does it process UHD sources at crisp 4K resolution, it even converts lower-resolution content to a level of clarity that's almost like Ultra High Definition.

Control4 The FIRST name in Home Automation

Award winning lighting control, Wireless integration, Scalable approach...
That is **BRILLIANT!**

HOME AUTOMATION

What can a Control4 home automation system do for you?

LIGHTING

Smart lighting provided a world of bright new possibilities.

- Using a customized keypad, an "All Off" button can shut off all lights, and even lock the doors and set the alarm.
- Save energy - and money—by setting your lights to 80% during the day, the additional 20% will help you be a little more green, and save a little more green as well.
- Timers and motion sensors can turn lights on and off automatically, all year long, even adjusting to the season.

WATCH

Take your viewing experience to and extraordinary level.

- Replace all of those remotes, with one that controls it all, even the home.
- All of your devices set themselves to the correct input, automatically.
- One button press can dim the lights, set the temperature and start the movie.

LISTEN

Listen to what you want, when you want. No matter where you are in the home.

- Everyone can enjoy their own music in their own space.
- Stream internet radio or enjoy your own custom playlist from almost any source.
- One press of a button can activate your personalized "scene"—cueing up your favourite artist and raising the shades.

SECURITY

A smart home can monitor itself, leaving you with peace of mind — whether you're there or away.

- Smart locks with personalized codes can keep you informed about who has entered your home.
- Give your alarm system added security with flashing interior and exterior lights when it's triggered.
- Make your home "mockupied" when it's not occupied with alternating lights and TV sets.

CLIMATE

Your home can respond intelligently to changing weather conditions.

- Use your smart-phone to turn up the temperature on your smart thermostat and arrive to a warm welcome home.
- Cue the shades to lower from the comfort of your couch.
- Your smart system can set the temperature automatically based on the timing of sunrise and sunset.

COMMUNICATION

It's your home, feel free to tell it what to do. However, it just might talk back.

- You can communicate room-to-room or with visitors at the front door with touch screens featuring audio and video capability.
- Displays can be sent to televisions in the home or alerts over the speakers telling family members "Time for dinner!"
- Get notifications if a sensor detects a leak in the basement or when the children make it home safely from school.
